EXAMINER'S AMENDMENT

1. Applicant's election of claims 18-23 in paper No. 4 is acknowledged. Because Applicant did not distinctly and specifically point out the supposed error in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). **Applicant have the right to file a divisional application covering the subject matter of the non-elected claims 1-17, 24.**

The traversal is on the ground(s) that see the election paper. This is not found persuasive because the fields of search for method' and device claims are NOT coextensive and the determinations of patentability of method and device claims are different, that is process limitations and device limitations are given weight differently in determining the patentability of the claimed inventions. Also, the strategies for doing text searching of the device claims and method claims are different. Thus, separate searches are required.

The requirement is still deemed proper and is therefore made **FINAL**.

2. An examiner's amendment to the record appears below. Should the change and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 1-12, 17, 24.

REASONS FOR ALLOWANCE

3. Claims 18-23 are allowed.

4. The following is an examiner's statement of reasons for allowance: None of the references of record teaches or suggests as cited in claims 18: moving the parent substrate on which the single crystalline nitride film is formed into a heating chamber that is connected to the reacting; moving onto a support the parent substrate, wherein the supporter is positioned in the heating chamber; heating the parent substrate up to a predetermined temperature which is higher than a room temperature; and while the single crystalline nitride film is at about the predetermined temperature that is higher than the room temperature, illuminating a laser beam on a backside of the parent substrate and separating the single crystalline nitride film from the parent substrate.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Itoh et al (6,218,207 B1): Method for Growing Nitride Semiconductor Crystals, Nitride Semiconductor Device, and Method for Fabricating the Same.
